

Addressable Universal Detector Base

Summary

Universal detector base for all EA-D devices. This base allows the installation to be first fixed including cable termination without the need for detectors to be on site. The base has terminals for the + and - connection of the loop with the addition of two terminals for connection to remote LED.

Key Points

- Universal base for EA-DX range
- Supports remote LED connection

Technical Specification	
Wiring	Loop: two wire, polarity-insensitive
Mounting Hole Distance	44.5mm~64.3mm
Material	ABS
Operating Environment	Temperature range: -10 to 55°C Humidity: 0 to 95% RH, non-condensing
Dimensions	Diameter: 100mm Height: 22mm
Weight	38g
