Digital Linear Heat Cable End of Line (EoL)

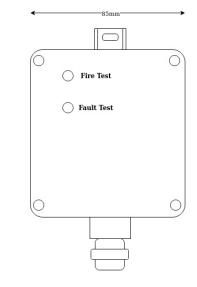

Summary

The digital linear heat cable End of Line works in conjunction with the interface (Part #LHD-INT). The digital linear heat cable terminates straight into this enclosure on 2 dedicated terminals. The End of Line provides robust protection for the termination in this metal IP66 rated enclosure. There are 2 buttons mounted on the front of the unit to provide test facility for both fire and fault conditions. This allows for routine maintenance checks without the need to disturb the cabling installation. All features of the device require that a LHD-INT interface is fitted to the other end of the cable.

Key Points

- EoL for our 700-XXX digital linear heat cable
- With local fire and fault test buttons
- Fire and fault relay output available
- Low-power design
- Metal case

Technical Specification	
Operating Voltage	NO ELECTRONICS
Operating Environment - Temperature	-55°C to 60°C
Operating Environment – Relative Humidity	95%
IP Rating	IP66
Dimensions Enclosure	90mm x 85mm x 52mm (L x W x H)
External Dimensions inc Mounting and Glands	130mm x 85mm x 52mm (L x W x H)
