

STI Weather Stopper®

STI-6535

PRODUCT OVERVIEW

Weatherproof cover designed to protect call points and other devices against the ingress of dust or water. The Weather Stopper is a protective cover that is ideal for extending the life and reliability of weather exposed devices, such as manual call points. It offers protection against harsh environments and conditions both outside and inside, as well as preventing tampering, vandalism and damage from accidental or malicious operation.

HOW IT WORKS

Easy to install, the Weather Stopper consists of a clear, tamperproof, tough polycarbonate cover, frame and weather gasket that retrofits over the existing device. The weather gasket seals the unit, preventing dust, grime and water from getting to the device. In the event of an emergency, simply lift the cover to gain access to the protected device.

KEY FEATURES

General Information

- Weatherproof cover to protect call points and other devices against the ingress of dust or water.
- Three year guarantee against breakage of polycarbonate in normal use.

Design

- Prevents ingress of dust or water, without hindering legitimate operation of a manual call point in the event of an emergency.
- Retrofit cover is built to meet the requirements of IP54.

Construction

- Tough polycarbonate housing can withstand the severest of knocks.

Installation

- A simple 4 fixing installation can retrofit over existing device.
- Polycarbonate tested -40°C (-40°F) to 49°C (120°F).

Options

- Can accommodate flush or surface mounted applications.
- Break seal option for added security.
- Available in a range of colours.
- Custom labelling available.
