Ziton ZP2 Panel Programmer Course

Panel programming for the ZP2 addressable panel with Ziton loop devices

01 COURSE DESCRIPTION

Panel programming for the ZP2 addressable panel with Ziton loop devices. Course is divided into modules to cover the theory and practical of system programming to include device setup and system configuration. By the end of the course the candidate should be competent to setup a fully working and tested stand alone fire detection system.

The course is aimed at any individual who is involved in the physical installation and commissioning of the ZP2 and loop devices. The course assumes that the delegate has working knowledge of fire detection principles or has passed the CR1000 course. The course does not include the loop hardware as this is covered in CR3100, whilst this is highly recommended as a prerequisite it is not mandatory in order to take this course

02 WHO SHOULD ATTEND?

- * ZP2 Panel Controls
- * User Access Levels
- * General Panel Settings
- * Device Programming on to the Loops
- * Understanding Analogue Values
- * Zone Allocation and Labeling
- * Loop & Battery Calculations
- * Fault Finding
- * Service & Maintenance Features
- * Handover to the Client

COURSE TOPICS 03

WHAT'S INCLUDED?

Workbook
Reference Guide
Lunch
Tea/Coffee
Certificate

1 day course
R1095.00
INCLUSIVE

04 COURSE OBJECTIVES

After successfully completing the course the candidate should be able to program, test and commission a ZP2 panel. The candidate should also be able to use the panel to fault find, service, maintain and handover the system to the end user. This course does not cover any work on the configuration software, networking or the use of repeater panel. For these advanced options Course CR3120 provides this instruction.

05

To successfully pass this course the candidate will need to take a multiple choice written examinations and carry out several practical assessments in order to demonstrate understanding of the modules covered. The candidate will need to **achieve 80% or higher** in these tests combined to receive certification.
